

OUUG's History

OUUG was founded in 2009 by a consortium of Oracle Utilities users led by Tier 1 utility customer Veolia NA to create a networking forum that addressed their specific Work & Asset Management (WAM) needs not initially met in the existing Oracle user group structure at that time. Reaching out to their former user group coordinator Cathy McCause, retired VP Global Marketing of the predecessor company SPL WorldGroup, they embarked on creating a supportive user group structure and annual event to meet the unique needs of the newly formed Oracle Utilities user community.

The initial self-funded OUUG conference was held in 2010, hosted at Veolia's Vancouver WA site, attended by 70 Oracle customers and a handful of legacy partner sponsors. Within two years, attendance had doubled and Oracle Utilities invited OUUG to co-locate the event at Oracle's headquarters in Redwood Shores, CA. In 2020, OUUG celebrated its 11th anniversary in Austin TX, the week prior to the COVID shutdown, with 800+attendees from the Oracle Utilities' product groups including CC&B, NMS, WAM, MDM, LPS, etc.
