

Submit Your Product Ideas on Oracle Forums

Oracle is introducing Oracle Forums, a new way for you to suggest ideas for many of our Oracle Energy and Water solutions. Oracle Forums provides an easy way to submit Cloud feature ideas directly to product owners in Oracle Energy and Water. Once an idea is submitted, other users can comment on and vote for your idea to show their support.

Submitting Your Idea

Submitting an idea is simple. When you go to [Oracle Forums](#), click **Sign In** to enter your Oracle account information or create a new account. Once you have signed in, select **New Post**. Select a solution category, title, and description for your idea. Click **Add Post** and product owners will be notified of your suggestion.

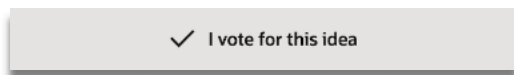

The screenshot shows the Oracle Forums interface for submitting a new post. At the top, there's a dark header with the Oracle logo, the word "Forums", a search bar, and user icons. Below the header, the main content area has a light gray background. It starts with a bold instruction: "Enter your idea for our Energy and Water Cloud products below and be as specific as possible." followed by a paragraph explaining that the user will be searched for similar ideas and that they can review the latest features on the Cloud Release Readiness site. It also mentions that if the user needs product support, they should go to My Oracle Support. Below this text is a form with several fields: a "Category" dropdown menu set to "Cloud Solutions Ideas: Analytics Solutions" (marked as "Required"), a "Title" text box with the placeholder "e.g. What is Elasticity?", a large text area for the post content with the placeholder "Enter your full post here. Be as specific as possible.", a rich text editor toolbar with options like Paragraph, Bold, Italic, Code, Bulleted List, Numbered List, Link, Quote, Embed, Image, and Attach, a "Mention users using @username" field, and a "Tags" dropdown menu. At the bottom, there's a "Subscribe" toggle switch, a "Cancel" button, and an "Add Post" button.

You'll automatically be subscribed to updates on your idea, and a product owner will change the status to let you know if the idea can be incorporated in the roadmap at this time. If your idea is included, a light bulb icon in the release notes will indicate that the new feature originated from an Oracle Forums request.

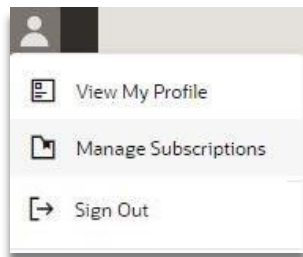

Note: Bug reports and general help questions are not considered ideas. Continue to use [My Oracle Support](#) for these types of requests.

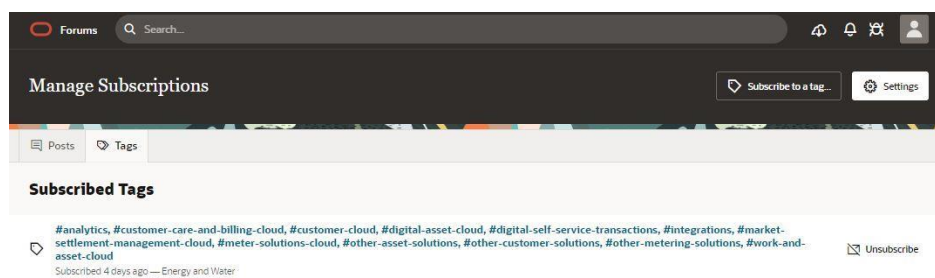

You can support other ideas you like on Oracle Forums by opening the ideas and voting for them.

To ensure that you are notified of new ideas, select **Manage Subscriptions** under the **User Menu** to pick which posts and tags you want to follow.

Tags align with solution categories (#integrations, #analytics, #customer-cloud, etc.), and you can change your settings by clicking **Subscribe to a tag**. While still in the **Manage Subscriptions** window, click **Settings** to manage your email notification options for Oracle Forums.

Check [Oracle Forums](#) frequently to add, comment on, and vote for ideas you like and have a voice in the future of Oracle Energy and Water solutions.
